

2024
CATALOG

Dear fishing enthusiasts,

Fiiish, an independent Breton company that has been a beacon of innovation in the competitive world of lure creation for over a decade, proudly presents you a new catalogue filled with exciting products and promising projects.

Our R&D team, composed of six passionate experts inspired by fresh or saltwater waters from around the globe, continues to craft innovative lures for all-level-anglers, from novices to seasoned pros.

This year, the Biotop Stick makes its debut in our catalogue following its notable arrival in the market in 2023. It's an eco-friendly lure with minimal environmental impact, delivering at the same time an exceptional fishing performance. With this revolutionary project, we remain steadfast in our commitment to safeguarding our waters and aquatic resources.

The Hypno Cast and the Black Minnow size 2.5 have garnered acclaim from anglers worldwide, a testimony to our unwavering dedication to meeting your needs.

Lastly, our prices remain stable amidst daily economic challenges which is a proof we will continue to offer you quality products and services at affordable rates. We are determined, guided by innovation, and fuelled by passion. Join the Fiiish family, and let's continue to write the story of recreational fishing together!

Experience YOUR fishing as an adventure – cast, reel in, repeat, and we are here to accompany you!

See you soon by the waterside,

The Fiiish team

REWARD

The Biotop Stick was awarded the **"Best New Product Award" in the Saltwater lure category at EFTTEX**, the European trade fair for recreational fishing. A great reward for the work accomplished by our team whose objective was to create a lure in biodegradable bioplastic in marine environment.

PACKAGING

To reduce our environmental impact, our packaging has evolved!

- Quantity of raw materials and weight of packaging reduced!
- Only 2 elements, because the fewer there are, the simpler waste management is: a cardboard box without glue or plastic, and a totally recyclable blister (PET).
- Use of non-polluting inks.
- Creation of a reusable blister, so the lure is better preserved.

BECAUSE WE WANT
**A GREENER
APPROACH.**
OUR LURES ARE
ENDOCRIN DISRUPTORS
AND ARSENIC
FREE 

GLOW COLORS

There are phosphorescent colors that bring the light back in the dark for a certain period of time after having been exposed to a light source. Glow lures recharge even better thanks to ultraviolet rays. Therefore, a UV lamp is recommended to recharge your lure. You will then get a higher and lasting visibility in the dark. The potential of the Glow colorings is best expressed in the deep sea or at night.

UV COLORS

Generally called UV colors, we should rather speak of fluorescent colors. They do not emit light in total darkness but have the ability to radiate at the slightest light source. Thus, they are particularly recommended when the sun is low (dawn and dusk), cloudy weather or murky water because they are then more visible.

RATTLE

The rattling sound mimics a swimming baitfish, enabling predators to detect the lure in turbid or tinted water.

- **DISCONTINUED PRODUCT**

Indicated prices are 2023 recommended retail prices.

SOFT PLASTIC LURES

BLACK[®] Family

ENDOCRINE DISRUPTORS
AND ARSENIC-FREE

FOR SLOW AND BOTTOM FISHING

BLACK
EEL[®]

BLACK
MINNOW[®]

PATENTED SYSTEM

Ensures the connection of the body, head, and hook.
All components are removable and replaceable.

Enhances body mobility for a highly natural
swimming action.

Ensures proper hook clearance during the strike.
Catch every fish without missing any!

HOOK

Hidden, it minimizes snags on the bottom.

Its wide opening is adapted to the size of the body to
improve the striking.

Optimised balance ensures a natural swimming
motion and maximum efficiency.

The strength meets VMC's 2X Strong category,
providing extra sturdiness for large catches.

DEVELOPED HOOK BY US.
PRODUCED IN FRANCE BY VMC.

RESPONSIVE AT VERY LOW SWIMMING SPEEDS, IDEAL FOR SLOW, LINEAR OR BOTTOM FISHING

Additional to the Black Minnow, the Black Eel stands out like no other when current slows down or by small coefficients. For beginners as for experts, in linear or vertical fishing. To be used with simplicity!

Interchangeable head

Developed to fit perfectly onto the body and painted with the same color.

There are several weights of heads available for each body size, suitable for both offshore and shore fishing.

Compact soft body technology

Lure manufactured through plastic molding using high-performance materials for enhanced durability.

Multi-injection process produces colored bodies throughout for a natural and long-lasting appearance.

Body infused with anise fragrance to deceive the suspicion of predators!

Ultra-natural swim

Like all lures in the Black Family series, the emphasis is placed on lifelike action. This paddle design produces a smooth and natural swimming motion.

Inversed paddle

Responsive to the slightest movement and the slightest current, the inversed paddle enables the lure to swim effectively during both the retrieval phase (pull up or linear) and the pause or descent phase (crucial for triggering attacks). With the Black Eel, you increase your chances to catch fish!

EFFECTIVE IN ALL ANIMATIONS TYPES, BOTTOM FISHING, LINEAR RETRIEVE OR TRACTION, WITH SLOW OR MEDIUM RETRIEVE

Interchangeable head

There are up to 9 heads of different weights and specific actions available for the same size. With Black Minnow, all types of fishing are possible.

X-soft body technology

Bodies are meticulously crafted by hand, providing flexibility to the plastic and an unmatched range of colors.

Ultra-natural swim

Like all lures in the Black Family series, the focus is on lifelike action.

This paddle design creates a smooth and natural swimming motion, while its transparency enhances realism!

SOFT PLASTIC LURES

CRAZY[®] Family

ENDOCRINE DISRUPTORS
AND ARSENIC-FREE

TO CATCH ACTIVE FISH IN OPEN WATER OR STRONG CURRENTS!

CRAZY[®]
PADDLE TAIL

CRAZY[®]
SAND EEL

CRAZY HEAD

Design:

It is designed to effective fishing in the entire water layer while increasing the wobbling of the lure. It is suitable for white water fishing (strong currents, rough sea, etc.).

Balance:

Heads from the Crazy range are versatile, suitable for both vertical and cast-and-retrieve fishing techniques (linear and vertical retrieval, pull-up method, etc.)

COMPACT SOFT BODY TECHNOLOGY

Injection:

Lures manufactured through plastic injection molding using high-performance materials for enhanced durability.

Colors:

Multi-color injection results in bodies with integrated colours, ensuring a natural and long-lasting appearance.

Scent:

The body is infused with an anise fragrance to deceive predator suspicion!

HIGHLY VERSATILE WITH SLOW OR FAST RETRIEVES, BOTH LINEAR AND TRACTION FISHING

Free hook

The opening serves as a guide to position the hook without difficulty; simply pierce it straight without worrying about the hook's curve.

The mobility and reactivity of the lure are increased while fishing.

The hook is released more easily during suction and the striking is more efficient. This concept significantly avoids tearing the body during the fight.

Inversed paddle

Swims at the slightest disturbance, with the slightest movement, throughout all fishing phases, whether during pauses or retrieval stages.

New Generation Paddle

The design and volume of this new generation of paddle have been specifically designed to move as much water as possible at very low swimming speeds. Within a body of water, the low-frequency wave emitted radiates outward.

IDEAL FOR MIDWATER FISHING, WITH TRACTION OR FAST LINEAR RETRIEVES. A PERFECT LURE FOR ACTIVE FISH!

Patented swimming action

Thanks to extensive research conducted in Brittany to replicate the natural movements of living garfish or sand eel, the unique swimming motion of the Crazy Sand Eel is irresistible to most marine predators along our coasts!

6 HEADS

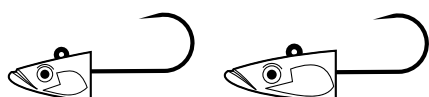

PRODUCED HOOK BY VMC

6 weights of the Crazy heads are available, depending on the sizes. It allows fishing in a maximum of conditions: current, wind and depth.

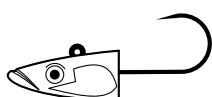

They have the same specific features which allow casting and retrieval or vertical, shore and offshore fishing.

MUD DIGGER

ENDOCRINE DISRUPTORS
AND ARSENIC-FREE

VERY RESPONSIVE, VERY LIVELY! IT SWIMS AT AN EXTREMELY SLOW SPEED WITH A SUPERB ACTION ON THE DESCENT

From our research on zander fishing, the Mud Digger is a lure that incorporates our latest concepts to outsmart the most cautious fish. Developed for both shore and offshore fishing, it will never let you down!

Glider head

The head of the Mud Digger is designed for a gliding descent. The flat surface on the underside of the "Digger" head allows it to land on the bottom while the body of the lure continues to float slightly.

In "vertical" fishing, this type of head makes the lure remain horizontal for a time, a few centimeters above the bottom; a position that greatly attracts predators during slow drifts.

Free hook

Increases the flexibility and reactivity of the lure to rod actions and makes the suction easier for the fish.

This concept significantly avoids the body ripping during the fight.

The opening serves as a guide to position the hook without difficulty.

Compact soft body technology

Lure manufactured by plastic molding with high performance material for better resistance.

Multi-color injection molding to obtain colored bodies in the mass for a natural and lasting result.

Anise-based aroma, effective in freshwater and saltwater.

Hybrid body

Perfect combination between a "finess" type of lure and a Paddle Tail. It thwarts the most difficult fish's mistrust, vibrating ingeniously and naturally.

It is developed both for vertical and linear fishing near the bottom.

Ultra natural swim

The design of this paddle produces a smooth and natural swimming motion.

Inversed paddle

The swimming action is generated with the slightest solicitation and movement, during all fishing phases, both during pauses and retrieval stages.

THE BODY OF THE MUD DIGGER
IS EXCELLENT, WHETHER USED AS
A DROP SHOT OR AS A TRAILER

VIDEO CONCEPT
PRESENTATION

WHEN AND WHERE TO USE IT?

Versatile and easy to use, the Mud Digger fishes also well in freshwater as at sea for delicate, slow and bottom fishing. It targets the majority of predators, depending on its size!

BLASTER SHAD

MULTIPLE CONCEPTS INTEGRATED INTO A SINGLE LURE FOR MAXIMUM EFFICIENCY

This lure, featuring multiple concepts, developed for pike fishing, allows for year-round use in all conditions. The Blaster Shad has been designed to adapt to all environments inhabited by pike.

Original Quick Clip

An accessory that clips the hook to the body of the lure during the fishing stages (casting and retrieval) and releases it during the strike. Easy to use, it improves the presentation of the lure and increases its lifespan.

New Generation Paddle

The amplitude is increased to move as much water as possible at very low speed to make the lure visible from afar.

Inversed Paddle

Ultra-responsive swimming, in motion or during breaks.

ENDOCRINE DISRUPTORS
AND ARSENIC FREE

- SIZE n°3 | 200 mm - 8 inch

PATENTED CONCEPT
PLAYER
ONE HEAD - MANY OPTIONS
MORE STRIKES

1 PLAYER Head

A single head compatible with several body lengths and colors. Go fishing with the same lure in different water depths and at different speeds.

2 PLAYER Block

By combining Light (Plastic), Medium (zinc), and/or Heavy (Tungsten) Player Blocks in the Player head, you can fish at various speeds and depths.

3 PLAYER Stinger

Resistance: + 40 lb (+ 18 kg)

Armament:

Specially developed for the Blaster Shad, it allows the locking of Player Blocks in the head.

Quick snap:

With its rolling swivel, it provides freedom of movement, making it harder to unhook during the fight.

Hook:

Developed in partnership with VMC to maximize hooking efficiency.

Biotop

STICK

NO KNOWN
ECOTOXICITY IN MARINE
ENVIRONMENTS

OUR FIRST TOPWATER LURE MADE IN FRANCE FROM BIODEGRADABLE BIOPLASTIC IN SEAWATER

Fiiish is proud to introduce its latest innovative lure: a bioplastic lure that is biodegradable in seawater. This groundbreaking innovation provides anglers with an environmentally friendly solution while maintaining ensuring both effectiveness and ease of use.

Recognizing the pressing challenges of plastic pollution, Fiiish's R&D department has dedicated substantial research and development efforts to creating a lure that fulfills fishermen's requirements while minimizing its impact on aquatic ecosystems. The entire process, from design and manufacturing to testing, spanned over 5 years.

Patented concept

- Ball eyes to enhance realism.
- Increases casting distance.

Body made from bioplastic

- Biodegradable in seawater.
- Produced from renewable resources.
- Mass coloring using mineral materials known to have no impact on the environment.
- Stainless steel hooks without any coating.

How to use it?

- Walking the dog from slow to fast.
- Fast linear retrieve.
- Ideal for calm weather or slightly rough seas.

Low environmental impact

Designed and manufactured in Brittany, the Biotop Stick minimizes its environmental impact through thoughtful design, manufacturing processes, and material choices.

CAST

VIDEO CONCEPT
PRESENTATION ▶

STABILITY AND PRECISION DURING CASTING, REACTIVE SWIMMING UPON ENTRY INTO THE WATER

Easy to cast and use, it differs from regular Casting Metal Jigs due to its central hook system. This design focuses on the fish's attack, reducing snagging and entanglements. Its high resistance allows for catching powerful fish.

Long casting distance

The rear center of gravity stabilizes it during the cast, allowing for precise and long-distance casting.

Stop-snagging system

The body balance and central-hook system keep the hook tip up, minimizing snagging on the bottom.

Focus Hook System

The central hook is strategically positioned to facilitate attacks and prevent entanglements.

The exclusive VMC hook is reinforced and forged. Its "Locking Shape" design prevents fish from coming unhooked.

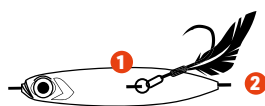

The feather enhances swimming action and aids in hook absorption.

HARD BAITS

Power Tail Family

100% DYNAMIC, ALWAYS IN MOTION

The patented plastic paddle is what makes the Power Tail a real success! It is a fairly dense lure but doesn't sink too quickly; it casts very well and accurately. It is one of the few hard baits that can be used in challenging conditions: strong currents, windy weather, or rough water.

POWER TAIL CONCEPT®

The Power Tail is a patented concept whose innovation lies in the combination of the body and the paddle.

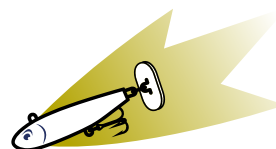

THROUGH WIRE INCREASES
LURE'S STRENGTH

PADDLE

Very durable and transparent plastic. In the water, the paddle becomes invisible, giving the lure a highly realistic swimming motion.

ACTION

On the descent, the paddle slows down the lure's speed, causing it to sway back and forth.

During pauses, the lure continues to swim.

During retrieval, the lure's swimming motion generates strong vibrations, imitating a fleeing fry.

SPIN THE SURFACE WITH THE POWER TAIL TO ATTRACT FISH, LET IT SINK FOR A FEW MOMENTS, THEN REEL IN SLOWLY. YOU WILL BE SURPRISED!

A UNIQUE LURE, A SPECIFIC DEVELOPMENT, AN EXCLUSIVE HOOK!

We started from scratch to create a version of the Power Tail, size 30, specifically balanced for Area fishing. We found the best compromise between casting distance, retrieval speed, balance, and animation diversity. This Power Tail XUL is truly a must-have in its category!

XUL Action

Halfway between a Minnow, a Crank and a Button, the Power Tail completes the Area universe with excellence. A unique and unmissable lure!

PWTSBH10

Barbless single hook developed in collaboration with VMC. Forged, lightweight and with a PTFE coating, this is the ultimate hook for the Power Tail 30!

LONG CASTING DISTANCE, EXCELLENT FOR FISHING UNDER WORKING BIRDS

Ideal for achieving good casting distances, especially when the sea is rough and it is difficult to get close to the shore or during windy conditions. With its fin, the line remains taut, helping you maintain contact with the lure and feel what is happening!

Perfect on toothed fish such as barracuda or skipjack. Equipped with a through wire that increases lure strength, you'll be able to catch tuna or exotic fish.

Power Tail Concept®

Super Distance de Lancer

Whether from shore or close to working birds, the density of the Power Tail you will be able to obtain great distances and accuracy casts!

A HIT LURE FOR PELAGIC FISHING!

These fish inhabit the upper water layers. In summer, they gather in groups and follow the migration of forage fish (sardines, anchovies, sand eels...) near the coast.

WHY POWER TAIL?

The strong vibrations produced by its paddle make the lure easily noticeable from a distance and excite the predators.

TECHNIQUE

Casting or trolling fishing for active fish.

VIDEO TECHNIQUE
AND ANIMATIONS

VERY ATTRACTIVE VIBRATION FOR SLOW RETRIEVAL

The "French Touch" of cuttlefish and squid fishing!
The Power Tail Squid requires a different approach; forget what you already know and use a single cast and retrieve with gentleness and slowness. .
At a low swimming speed, it emits strong vibrations; don't rush it!

Power Tail Concept®

Glider head

The head of the Power Tail Squid fits perfectly on the bottom and offers a beautiful presentation of the lure. An impressive weapon for cuttlefish fishing!

No snagging!

Innovative hooking system

Unlike existing squid jigs typically positioned at the back of the lure, the one on the Power Tail Squid is located further forward on the body, preventing it from getting stuck at the bottom.
Cephalopods will grab the lure closest to the hooks for maximum success!

1 SIZE

SIZE **95 mm - 3.7 inch**

Cephalopods fishing is practiced both from the shore and offshore. We offer 3 weights that allow you to adapt to the majority of fishing conditions.

15 g **SHORE** Shore fishing in depths not exceeding 10m.

25 g **OFFSHORE** Deeper fishing from the shore but also light off-shore fishing.

50 g **DEEP** Vertical offshore fishing.

THE PERFECT COMBINATION!

A concept to assist you in choosing the perfect Braid/ Fluorocarbon/Lure Snap combination based on your requirements. Select your desired strength along with the recommended knots provided below, and you're all set!

BRAID

This 8-strand braid is ultra resistant, round, smooth and silent, thanks to:

- a high performance HDPE material;
- a first hydrophobic coating;
- a secondary coating that enhances smooth sliding through the rings.

FLUOROCARBON

100 % fluorocarbon!

It is made with 5 layers: abrasion resistance, slide quality and flexibility.

LURE SNAPS

Our snaps are crafted from high-quality stainless steel. They are compact, discreet, and provide optimal action for your lures.

KNOTS THAT WE LIKE...

PEIXET

➤ Knot to tie braid and fluorocarbon

- 1 Make a simple knot on the fluorocarbon X Strong at about 2 inch.
- 2 Pass the braid through this knot.
- 3 Pass the braid around fluorocarbon 12 times downwards.
- 4 Pass the braid around fluorocarbon 8 times upwards.
- 5 Pass the braid back through knot in the fluorocarbon.
- 6 Make 5 half hitch knots with the braid up the fluorocarbon.
- 7 Tighten the knot by pulling on both the fluorocarbon and braid.
- 8 Trim the tag ends of braid and fluorocarbon.

PALOMAR

Knot to tie lure snap and fluorocarbon

- 1 Make a loop.
- 2 Thread the loop though the lure snap.
- 3 Tie a simple knot.
- 4 Pass the lure clip though the loop.

ACCESSORIES

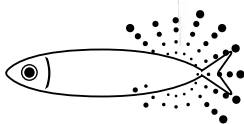

ATTRACTANT

ORGANIC ATTRACTANT

The effectiveness of this formula stems from a balanced combination of amino acids, fish attractants, fish oils, and texturizers.

This lipoprotein solution, devoid of metallic flakes (to prevent pollution), is highly oily and water-resistant, guaranteeing swift results.

CONCENTRATED ACTIVE SMELL,
100% ORGANIC
INGREDIENTS

RED

Apply behind the jig head to mimic the gills, under the stomach to act as "a wounded distressed fish", along the body to increase the voracious predator's catch. As a blood signal, the red attractant colors the lure.

GAM383 Red - 40g - 1-2/5 oz 3 700696 803837

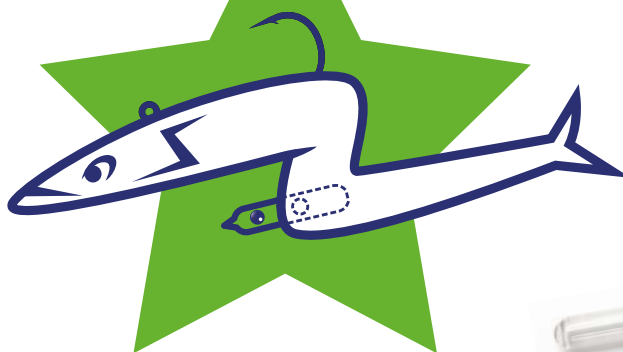

NATURAL

Use a spatula to smear the attractant along the lure body. Black Minnow ridges are ideal for this. The "natural" attractant does not change the color of the lure.

GAM385 Natural - 40g - 1-2/5 oz 3 700696 803851

RATTLE

NOISY GLASS CAPSULE

The rattling sound mimics a swimming baitfish, allowing predators to detect the lure in turbid or tinted water.

GAM321 5 Rattles 3 700696 803219

THE GLUE

ETHYL
CYANOACRYLATE

USE THE GLUE TO REPAIR YOUR
DAMAGED SOFT LURES

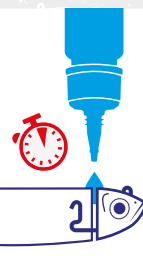

INCREASE THE EFFICIENCY OF THE LURE

Applying the glue to attach the jig
head to the body of the lure increases
resistance and enhances the lure's
action in the water.

The glue has been developed
specifically for soft plastic lures.

QUICK-SETTING!
DRIES IN SECONDS

HOW TO USE IT?

1. Carefully apply a tiny drop of the very fluid glue over the desired area. Avoid letting the nozzle of the tube touch the lure to prevent blockage over time.
2. Apply slight pressure for a few seconds.
3. Go fishing!

GAM183	10g - 3/8 oz	3 700696 801833
	By unit in cash register	
GAM1352	10g - 3/8 oz	3 700696 813522
	Unit Packaged	

Original Quick Clip

Adjust the opening of the Quick Clip to match the
size of your hook for optimal efficiency.

HOLD & RELEASE YOUR HOOK

An accessory that secures the hook
to the body of the lure during casting and
retrieval, releasing it upon hooking.

Easy to use, it enhances the lure's
presentation and prolongs its lifespan.

ADAPTABLE
ON ALL YOUR
SOFT PLASTIC
LURES!
