LUCKY JOHN TECHNICAL SOLUTIONS AND CHARACTERISTICS OF REELS

	A mechanical braking system	The simplest spool braking system when casting a lure.
	Magnetic drag system	With this drag system you can adjust your reel drag in very sensitive mode.
	Bearings	The ball bearings are made with high precision. They ensure the smooth rotation of the reel mechanism and assemblies. Roller bearings withstand higher loads than ball bearings, they are installed in the most important and most loaded assemblies of the reel mechanism. They ensure the operability of the reel anti-reverse mechanism. Both ball and roller bearings significantly increase the reel's operation life.
	Ball bearings	The ball bearings are made with high precision. They ensure the smooth rotation of the reel mechanism and assemblies; they also increase the reel's operation life.
	Reinforced, stainless steel ball bearings	The bearings are designed for increased loads. They have an increased operational life. Bearing material is not subject to corrosion.
	Gear ratio	The gear ratio is one of the main technical characteristics of the reels and indicates the number of rotations of the spool made per turn of the reel handle. The higher the gear ratio, the higher the speed of the winding, and, accordingly, the lower the gear ratio, the lower the winding speed.
	Instant anti-reverse (IAR)	A special mechanism of the overrunning (backstop) clutch that prevents the minimum reverse rotation of the reel rotor. This eliminates all impact loads on the mechanism while playing the fish.
	Graphite body	This reel body is made of special, durable plastic (graphite).
	Main aluminium spool (lightweight)	The spool is made of aluminium alloys (with special holes in the body that make it lightweight).
	Main graphite spool	The spool is made of special, durable graphite.
	Spare aluminium spool	The spare spool is made of aluminium alloys (with special holes in its body to make it lightweight).
	Spare graphite spool	The spare spool is made of special, durable graphite.
	Big line roller, extended (anti-twist)	The increased conical roller prevents the fishing line from twisting and ensures a more reliable, and non-slip passing of the fishing line through the roller when winding the line.
	Hollow bail wire (lightweight)	The lightweight bail of the fishing line laying mechanism. The bail has a hollow shape and is made of stainless steel.
	Wear-resistant titanium nitride coating	A modern and the most wear-resistant coating applied to the main material of the reel parts. It ensures maximum longevity for friction surfaces.
	Aluminium handle, machined	The reel handle is made by means of building the blank from durable aluminium alloys.

LUCKY JOHN MULTIPLIER REEL **BLACK SENSE ULTIMAX 10**

- Mechanic Drag
- Magnetic Drag
- Star drag
- 9 stainless steel ball bearings
- 1 stainless steel roller bearing
- Instant anti-reverse
- Reel body – high durability light weight plastic
- Spool – shallow aluminium
- Line roller with worm shaft

Handle:

- Left
- Aluminum
- Balanced
- Ergonomic EVA handle knobs

LUCKY JOHN BAITCASTING REEL

LUCKY JOHN MULTIPLIER REEL **VANREX CAST 6**

«High quality low profile baitcasting reel with left hand handle placement.

Reel has two drag systems: 10 position Magnetic for very fine drag adjustment and Mechanic drag system. Reel is equipped with high quality stainless ball bearings.

- 5 ball bearings
- 1 roller bearing
- Instant anti-reverse
- Reel body and rotor made from high durability plastic
- Spool – shallow aluminium
- Magnetic and mechanic drag systems

Handle:

- Left hand placement
- Ergonomic rubber knob»

LUCKY JOHN SPINNING REEL ANIRA SERIES

SPINNING REEL ANIRA JIG 8

Reel developed for jig technique. Great combination of price/quality.

- Front drag FD
- 7 ball bearings
- 1 roller bearing
- Instant anti-reverse
- Reel body and rotor made from high durability plastic
- Main spool - shallow aluminium
- Spare spool - shallow aluminium
- Lightweight, hollow bail arm
- Big line roller extended (anti-twist)

Handle:

- "Screw in" type
- Possibility of right/left placement
- Ergonomic rubber knob

LUCKY JOHN TECHNICAL SOLUTIONS AND CHARACTERISTICS OF RODS

BLANK MATERIAL

The blank material of the fishing rod is carbon fibre

The fishing rod blank is made of carbon fibre. Carbon fibre is very durable; because of this, fishing rod walls are made very thin and the fishing rod has a minimal weight and high sensitivity.

ACTION TYPE

Blank action type – composite

The upper 1/3 of the blank bends when being loaded.

Blank action type – medium-composite

The blank bends between the upper 1/3 and 1/2 when being loaded.

Blank action type – medium

The upper part of the blank bends when being loaded.

CLASS

UL spinning rod class

Spin fishing rods designed for casting lures weighing up to 5 grams.

L spinning rod class

Spin fishing rods designed for casting lures weighing from 3 to 15 grams.

ML spinning rod class

Spin fishing rods designed for casting lures weighing from 5 to 20 grams.

M spinning rod class

Spin fishing rods designed for casting lures weighing from 7 to 30 grams.

MH spinning rod class

Spin fishing rods designed for casting lures weighing from 10 to 45 grams.

FISHING ROD CONNECTIONS

In Steek connection

Fishing rod pieces are connected by fitting the upper piece into the lower one.

Over Steek connection

Fishing rod pieces are connected by fitting the upper piece over the lower one.

GUIDES

Guides with SIC inserts

The fishing rod guides have silicon carbide (SIC) inserts. These wear-resistant guides allow stranded cord to be used for.

ARRANGEMENT OF GUIDES

Guides arranged according to a new concept

Arrangement of the fishing rod guides according to a new concept allows uniform load distribution on the upper blank part of the spinning rod to be achieved. Small diameter guides in the upper blank part used for this purpose do not disturb the dynamic features of the spinning rod. In this case, the number of Guides is greater than in the case of arrangement by traditional approach.

HANDLE

Handle

The convenient shape of the cork handle lets you performing continuous manipulations with the fishing rod while fishing – Ergonomic cork without any discomfort for the angler's hands.

Neoprene ergonomic handle

The convenient shape of the neoprene handle lets you perform continuous manipulations with the fishing rod while fishing, without any discomfort for your hands.

REEL SEAT

Screw-type reel seat

The reel is compositeneed in the reel seat by the special locking nut, which has a lock that rotates along the line.

BRAIDED FISHING LINE VANREX X4

A modern 4-strand braided fishing line made of PE fibre. The round cross section of the line in combination with a smooth and "slippery" surface provides a long casting distance of the bait: jig head, wobbler or a spinner. High braid density and increased durability allow the line to be used in all seasons. Supplied in individual package – 125 m length. Excellent combination of price and quality.

- High abrasion resistance
- Round cross section
- Increased durability
- Maximum casting distance
- All-season usage
- Fluo orange color

BRAIDED FISHING LINE VANREX EGI & JIGGING X4 MULTI COLOR

Multi-colored fishing line, perfect for jig fishing. The color changes every ten meters, which provides good visual control of the cast. After each meter there is a white mark on the line, which allows to determine precise casting distance.

- high durability
- low stretch ratio
- high sensitivity
- increased casting distance
- enhanced wear-resistance
- all-season usage
- multi-color

BRAIDED FISHING LINE AREA TROUT GAME X4 PINK

Specialized thin braided line for area trout fishing. 4-strand braided fishing line made of PE fibre. Due to the cross-section and special coating, the line perfectly slides through the guides, allowing to cast small baits for long distances. Pink color in combination with thin diameters does not frighten trout and the number of bites increases.

- high durability
- low stretch ratio
- high sensitivity
- increased casting distance
- enhanced wear-resistance
- all-season usage
- color – pink

MONOFILAMENT FISHING LINE **FLUOROCARBON HARD**

Fast sinking (specific weight – 1,78g/cm³) durable fishing line designed for tying leaders and shock leaders. Fluorocarbon is invisible in water, does not absorb water and retains its durability for a long period. Low linear stretching ability prevents the thinning of fishing line and retains its durability, which allows making a stiff strike. Supplied in individual package – 30 m length. Produced in Japan.

- 100% fluorocarbon
- Fast sinking
- Invisible in water
- High sensitivity
- Zero water absorption
- Enhanced wear-resistance
- Durable at the knot
- Transparent colorless fishing line

MONOFILAMENT FISHING LINE **FLUOROCARBON SOFT**

Fast-sinking (specific weight – 1,78 g/cm³) durable fishing line. Fluorocarbon is invisible in water (light refraction angle is the same as with water), does not absorb water and retains its durability for a long period. Low linear stretching ability prevents the thinning of fishing line and retains its durability, which allows making a stiff strike. The fishing line is unreeled onto high-tech doughnut spools of 100 metres. The fishing line is produced and unreeled at a specialised factory in Japan.

- 100% fluorocarbon
- Fast sinking
- Invisible in water
- High sensitivity
- Zero water absorption
- Enhanced wear-resistance
- Durable at the knot
- Transparent colorless fishing line

SOFT LURES LUCKY JOHN PRO SERIES

All Lucky John lures have stable flavour and smell (crayfish, shrimp or mackarel). The flavouring and aromatic substances are not only applied to the lures surfaces, but also are the part of lures material. Scent&Taste Inside Formula guarantees that 65% of attractant is placed inside lure material, other 35% composes special substance used for lures treating before packaging. The attractant composition is a secret of Lucky John Company. This way in these lures made of the „eatable rubber” an attractant is maximally kept for the long time. The color-grade is also well matched, the range of lures includes all colors, popular among anglers, therefore, it is easy to choose the required one. For example, the popular among perch-anglers green-brown color-grade is presented by few colors variants. Among them are Cola – well-known „engine oil” and close to this color Nagoya Shrimp „american”, Green Pumpkin, Dark Green and Kiwi Seed. There are many other variants of colorations, so Lucky John has its solution for all kinds of predator's mood.

FREDDY FROG 2,5"

NEW

FREDDY FROG is a true frog imitation with two legs and weed protected hooks. Lure is developed for a great surface action, highly efficient for pike fishing!

ITEM NO.	COLOR	LENGTH ("/CM)	SIZE (G)	Q-TY IN PACKAGE (PCS.)
140422-***	007, 008, 009, 010, 011, 012	2,5"/6,3	23	1

FROG 2,0"/2,6"

FROG – a soft rubber, surface floating lure. The lure imitates a frog and is designed for catching predators in heavily overgrown waters, where the use of other lures is impossible. When the bait falls in the water, the hooks are always oriented upwards, and the double-hook tips are pressed against lure's body, therefore, when guiding, the hooks do not catch on the water plants. The main fishing target is pike. The main method of guiding – light jerking of the lure with short intervals, simulating the frogs' jumps on the water surface. To avoid unrealized bites, do not rush. When you see that pike has grabbed the lure, ease the line, wait for fishing line to tighten, and only then pull. Usually, when missed, the pike repeatedly attacks the bait. The lure is made in sizes of 2" (5,0 cm) and 2,6" (6,5 cm). To avoid lost bites, it is recommended to insert an additional hook to the lure – the LJ Frog Trailer Hook (art. LJPTH-001).

ITEM NO.	COLOR	LENGTH ("/CM)	Q-TY IN PACKAGE (PCS.)

PACKAGE OF UNAGI SLUG

3,0"/3,5"

The secret of the efficiency of UNAGI SLUG lies in the lure's design. The Slug is divided by thin partitions into several sections. Even with very careful jerks the tail of the lure starts actively moving and attracts the most passive fish. UNAGI SLUG is impregnated with shrimp attractant that guarantees results in any predator fishing. The lure available in 2 sizes – 3" (7,6 cm), 3,5" (8,9 cm).

PACKAGE OF JOCO SHAKER SUPER FLOATING

3,5"/4,5"/5,5"

JOCO SHAKER Super Floating is a lure with a classic shape of a shad and ribbed surface of the body. The material of the lure has extremely low density, therefore it is lighter than water. The lure will retain its floating properties even after its use on different tackles and after pike's "bites". The lure is impregnated with mackerel attractant, which is also applied to lure's surface in liquid form. The bait has a special "pocket" for offset hook insertion. JOCO SHAKER SUPER FLOATING is produced in the following sizes: 3,5" (8,9 cm) – for catching perch and zander, 4,5" (11,4 cm) and 5,5" (13,8 cm) – for catching pike.

PACKAGE OF SHADS **TIOGA**

2"/2,4"/2,9"/3,4"/3,9"

TIOGA is a lure specially designed for perch and pike perch (zander) fishing. The unique shape of the body provides movements in the water generating swings attracting a predator. The side ribs serve to enhance the lure's play, making its movements more real. This hybrid lure has a worm-like body with the typical thickening in the front part and small claw-tail of the shad. The lure is impregnated with a mackerel attractant. TIOGA is available in multiple colors and 5 sizes – 2" (5,1 cm), 2,4" (6,1 cm), 2,9" (7,4 cm), 3,4" (8,6 cm), 3,9" (9,9 cm).

PACKAGE OF S-SHAD TAIL 2,8"/3,8"

S-SHAD TAIL is a shad with an elongated ribbed body. Lure's body has a different cross section in the front and back parts - this geometry of the lure gives it a special game that attracts any predator. S-SHAD TAIL is manufactured using advanced technology. The lure has explicit taste and scent of mackerel – its body is impregnated with an attractant and coated with a special aromatic oil. After fishing it is recommended to put the lure back into the package, since it contains aromatic oil, and lure will "recharge". S-SHAD TAIL is a great solution for fishing from early spring to late fall. S-SHAD TAIL available in various colors and 2 sizes – 2,8" (7,1 cm) and 3,8" (9,6 cm).

PACKAGE OF SHADS MINNOW 2,2"/3,3"/4,4"/5,5"

LJ MINNOW is the most popular model of shads with a classic shape. The lure's little fish like body along with the tail fin generate incredible game when moving in water. The base of the lure is soft plastic which perfectly retains the shape of the lure and is resistant to external impacts. The lure has explicit taste and scent of mackerel – its body is impregnated with an attractant and coated with a special aromatic oil. This strong attractant and a wide range of colors makes this lure universal for any type of fishing for the most popular predators. MINNOW available in 4 sizes – 2,2" (5,6 cm), 3,3" (8,4 cm), 4,4" (11,1 cm), 5,5" (13,9 cm).

PACKAGE OF SHADS **LONG JOHN** 3,1"/4,2"

LONG JOHN – one of the most popular soft lure models in the world. The stretched body gives it the unique game - effect of "wriggling" lure. LONG JOHN perfectly works with classic jigging method and with any other technique. The lure has explicit taste and scent of mackerel – its body is impregnated with an attractant. Perfect proportions of the body and the tail always ensure steady operation of the lure with various weights. LONG JOHN available in many different colors and 2 sizes – 3,1" (7,9 cm), 4,2" (10,7 cm).

PACKAGE OF **ROCK CRAW** 2,0"

LJ ROCK CRAW – a bait imitating a crayfish. This lure is active, unlike other passive baits of this type. The lure is universal – it may be used on a classic jig or on different leader systems. The lure's moving legs and tails create vibrations that attract predator fish. It is impregnated with crayfish attractant that will especially appeal to fish which have a strong sense of smell – for example, catfish. This lure will definitely attract large perch and zander, which are big crayfish lovers. The same size – 2" (5 cm) – ROCK CRAW is available with two different attractants – crayfish and shrimp.

Surface

LUCKY JOHN PRO SERIES WOBBLERS

MCS
MAGNETIC CAST SYSTEM

OSS
Outside Stabilizer System

Magnetic Cast System (MCS) – a system consisting of a magnet and fixed and static balls, which allows casting a lure for the longest distance possible without kinking and dead on target. This system ensures qualitative balancing and easy handling of a wobbler at any type of reeling. MCS system is the first patent in the production of PRO Series wobblers.

How does MCS system work? During the casting, the ball is detached from the magnet by the centrifugal force and rolls to the tail end of the lure, thus shifting the centre of gravity. After touching the water, when the reeling starts, the ball rolls to the head end of the wobbler, where it is fixed by the magnet. To ensure roll stability, there are five balls located in special compartments of the lure: three in the head end, and two – in the tail end. During the reeling, these balls have low degree of motion, thus allowing aggressive reeling with the lure.

Outside Stabilizer System (OSS) – a system of external stabilization of a lure with the help of a tungsten ball. The lower part of lure's head features a special capsule with a tungsten ball next to the dropping blade. As continuous tests of such design have shown, the weighted upper part of crank-baits is what creates distinctive vibration. OSS is not only additional vibration of the lure during the reeling, but also additional increase of flying range. At the moment, OSS system is the most effective stabilizing system of crank-bait class lures.

Complete set

Wobblers are equipped with high-quality Japanese hooks and factory guides.

LJ MAKORA wobbler is the classic series of jerk-baits designed in two sizes – 110 mm and 130 mm. The wobblers of these series are special by their unique action they demonstrate during jerking and even guiding. Its body combined with the weight makes the wobbler move from side to side and turning a little around when jerking. The Magnetic Cast System of the wobbler will ensure long casting distance with very high precision. MAKORA available in two versions – floating and suspending which allows to target wide range of predators. Three treble hooks will not let fish to escape.

HAIRA TINY SHALLOW PILOT 33F HAIRA TINY SHALLOW PILOT 44F

LJ TINY HAIRA SHALLOW PILOT – small Crankbait class lure with a thick body, small lip, and the size of 33 and 44 mm. The wobbler available only in floating version. The maximum working depth of the lure is 20 cm. The wobbler quickly surfaces after stopping, which allows effectively avoid underwater obstacles. The lure moves actively: it frequently vibrates, producing at the same time a noticeable and attractive wave for every predatory fish. Thanks to Outside Stabilizer System (OSS) all HAIRA TINY SHALLOW PILOT wobblers show additional vibration during reeling and they have increased casting distance. The main targets of HAIRA TINY SHALLOW PILOT are chub, trout, asp, perch, and pike.

POP-X 6,5F, 9F

LJ POP-X – popper type wobblers of the Lucky John Original series lures. Poppers belong to specific seasonal hard lures that are usable in particular fishing conditions. In the practice of spinning fishing, there are not so many effective surface baits, but poppers have become the most common for the water surfaces. Reviews of anglers about the POP-X wobbler are the most exciting. It is called a “super bait” – durable, excellent performance and easy to use. To cast this lure does not require special effort, it flies rapidly and accurately, easy to manage. When it enters the water, it creates a tempting sound effect that very much attracts fish. POP-X available in two sizes – 6,5 cm and 9,0 cm. The smaller size is more targeted for perch, asp, and chub fishing. The size of 9,0 cm is perfect for pike fishing.

ITEM NO.	MODEL	COLOR	TYPE	LENGTH (CM)	WEIGHT (G)	DEPTH (M)

ARROW JERK

SHALLOW AND SINKING

NEW

LJ BBS ARROW JERK 150

BBS ARROW JERK – a series of sinking and floating lures. Specifically designed for catching large predatory fish. The wobbler has a very distinctive game, therefore it is better to try it in shallow waters first. This will allow to choose the right leader, the strength of the jerks and the length of the pauses. BBS ARROW JERK will show its best potential on rhythmic, short jerks. The durable plastic and resistant coating will withstand pike teeth.

ITEM NO.	MODEL	COLOR	TYPE	LENGTH (CM)	DEPTH (M)
LJ00515F-***	ARROW JERK F	003, 008, 017, 024, 025, 026, 027, 028, 029, 030, 031, 032	floating	15,0	0–1,0
LJ00515S-	ARROW JERK S	024, 025, 026, 027, 028, 029, 030, 031, 032	sinking	15,0	0,5–4,0

ARROW JERK 8F, 10F ARROW JERK 8S

LJ ARROW JERK – wobbler with an aggressive game that will attract large predators. The bait is available in two versions – floating and sinking. ARROW JERK comes in multiple colorings and 2 sizes – 8,0 cm and 10,0 cm. The main target of ARROW JERK is pike.

ITEM NO.	MODEL	COLOR	TYPE	LENGTH (CM)	WEIGHT (G)	DEPTH (M)
LJ00508F-	ARROW JERK F	001, 002, 003, 008, 011, 017, 018, 019, 020, 021, 024, 025, 026, 027, 028, 029	floating	8,0	19,0	0–0,8

CHUBBY F 4F

Chubby – the light weight hard body crankbait. Perfect search bait or one of the most used cranks for trout, asp and perch fishing in shallow waters. You can work the lure down to half a meter, and then slowly roll it back. It will work everywhere at any time.

ITEM NO.	MODEL	COLOR	TYPE	LENGTH (CM)	WEIGHT (G)	DEPTH (M)
LJ02004F-	CHUBBY F	002, 004, 009, 010, 011, 012, 013, 014, 015, 017, 018, 019, 020	floating	40	4	0,4

PILOT-X 4,5F

LJ PILOT-X – a crank type wobbler with very active, original game. The lure is most effective at steady guiding. PILOT-X available in size 4,5 cm. Its main targets are perch, asp and chub.

ITEM NO.	MODEL	COLOR	TYPE	LENGTH (CM)	WEIGHT (G)	REC. BRAIDED LINE Ø (MM)	DEPTH (M)
LJ004045F-***	PILOT-X F	001, 002, 003, 005, 007, 008, 009, 013, 017	floating	4,5	8,0	0,13	0–1,2

SHAD CRAFT 5F, 7F

LJ SHAD CRAFT – wobbler specially designed for pike fishing in still waters without currents. The shape of the wobbler is strongly flattened from the sides and it gives to the bait the original game. The wobbler shows excellent casting characteristics and bites' results. SHAD CRAFT available in floating version and 2 sizes – 5,0 cm; 7,0 cm.

ITEM NO.	MODEL	COLOR	TYPE	LENGTH (CM)	WEIGHT (G)	DEPTH (M)
LJ01105F-	SHAD CRAFT F	A024, A026, A029, A037	floating	5,0	5	0–0,6

SHADY CRANK 6F

LJ SHADY CRANK – universal floating wobbler for fishing in deep waters with depths greater than 3 meters. It floats steady at any speed, which makes possible to use it in various fishing conditions. The excellent casting characteristics of the wobbler expand the fishing area and allow targeted casting. By changing the guiding speed, the bait is suitable for catching both active and passive fish. SHADY CRANK available in size – 6,0 cm.

ITEM NO.	MODEL	COLOR	TYPE	LENGTH (CM)	WEIGHT (G)	DEPTH (M)
LJ01206F-	SHADY CRANK F	A007, A026, A029, A037	floating	6,0	12,0	0–2,8

SHAD-X 8F SHAD-XDR 8F

LJ SHAD-X/SHAD-XDR – wobblers for a wide variety of fishing types and conditions. Due to the active game, they are perfectly usable both for twitching and for smooth guiding. Available in size 8,0 cm and two depth versions – up to 1,2 m – SHAD-X and up to 2,5 m – SHAD-XDR.

ITEM NO.	MODEL	COLOR	TYPE	LENGTH (CM)	WEIGHT (G)	REC. BRAIDED LINE Ø (MM)	DEPTH (M)	ENC

MAGIC SINKER 10S

LJ MAGIC SINKER – a highly functional wobbler for twitching. This sinking lure is very effective for predator fishing at 2–3 meters depth, even with fast guiding. With light jerking and stronger twitching MAGIC SINKER imitates a small fish hiding from danger. The small balls that are embedded in the body of the lure create sound that will provoke even the most passive predators. The main target of MAGIC SINKER are pike and zander. MAGIC SINKER is available in size 10,0 cm.

ITEM NO.	MODEL	COLOR	TYPE	LENGTH (CM)	WEIGHT (G)	REC. BRAIDED LINE Ø (MM)	DEPTH (M)

SPINNERS LUCKY JOHN BONNIE BLADE

LJ BONNIE BLADE – series of spinners with an oval blade. These lures have stable and reliable action that attracts predators. The blade is lightweight, made of brass, and has good dynamics when rotating in the water. The blades are painted from both sides. All treble hooks have fixed bright fly which hides the hook and helps to stabilize spinner in the water. BONNIE BLADE has two types of weights – with balls and cylindrical. The main targets of BONNIE BLADE are perch, pike, trout, and salmon. BONNIE BLADE available in six weights – 2,7; 3,5; 4,3; 6,4; 10,3 and 13,4 grams.

ITEM NO.	COLOR	WEIGHT (G)	Q-TY IN PACKAGE (PCS.)

SPINNERS LUCKY JOHN TRIAN BLADE ROUND

LJ TRIAN BLADE ROUND – series of spinners with a classic oval blade. These lures have stable and reliable action that attracts any predators. The blade is made of brass and it is painted from both sides. The rotation angle of the blade is 60 degrees. The body of the spinner is made of heavy alloy that ensures additional casting distance. The body also has specific geometric shape that reduces fishing line twisting. All treble hooks have fixed bright fly which hides the hook and helps to stabilize spinner in the water. TRIAN BLADE ROUND is available in four weights – 6, 9, 12 and 18 grams.

ITEM NO.	COLOR	WEIGHT (G)	Q-TY IN PACKAGE (PCS.)
LJTBR6-***	001; 002; 003; 004; 005; 006; 007; 008	6	1

SPINNERS LUCKY JOHN TRIAN BLADE LONG

LJ TRIAN BLADE LONG – series of spinners with a classic shape. These lures have stable and reliable action that attracts any predators. The blade is made of brass and has small holes that help to make additional swings. The rotation angle of the blade is 30 degrees which allows to use this spinner in strong currents. The body of the spinner is made of heavy alloy that ensures additional casting distance. The body also has specific geometric shape that reduces fishing line twisting. All treble hooks have fixed bright fly which hides the hook and helps to stabilize spinner in the water. TRIAN BLADE LONG is available in two weights – 6 and 9 grams.

ITEM NO.	COLOR	WEIGHT (G)	Q-TY IN PACKAGE (PCS.)
LJTBL6-***	001; 002; 003; 004; 005; 006; 007; 008	6	1
LJTBL9-***	001; 002; 003; 004; 005; 006; 007; 008	9	1

LUCKY JOHN BELL SPIN

A classic spinner with a round, elongated «comet» shape blade. It has a specific cone-shaped core that looks like a bell. During the action in the water, it creates low-frequency sound that helps to attract the fish. The shape of the spinner body significantly reduces the fishing line twisting. The rotation angle of the blade is 45°. It is recommended to use this spinner in calm waters and in rivers with a weak and medium currents.

LUCKY JOHN BASARA TAIL SPIN

NEW

BASARA TAIL SPIN is a super versatile long casting lure. The main advantage of the spinner is the casting distance and various retrieving options. Great action on the drop and on retrieve – the lure vibrates and flashes at the same time provoking the fish to strike hard. Cast and retrieve in various speeds and let fall on a tight line occasionally. BASARA TAIL SPIN available in 3 weights – 8, 14 and 21 grams.

ITEM NO.	COLOR	WEIGHT (G)	Q-TY IN PACKAGE (PCS.)

SPOON-BAITS LUCKY JOHN EOS

AREA
Trout
GAME

LJ EOS – spoon bait series for trout fishing with ultra-light and light spinning rods. These spoon baits are perfect for trout fishing in ponds, natural waters and in rivers with medium currents at shallow depth. EOS spoon bait has concaved profile with a special tail bend, which gives it a unique action. When guiding, the lure moves very straight without wide swings from side to side - its movements look like a game of crankbait type wobblers. Due to its light weight, it is possible to guide the lure on the very surface of the water. EOS available in five weights – 1.8; 2.4; 3.5; 5 and 8 grams.

HIGH-QUALITY HOOKS – LUCKY JOHN

A series of high-quality hooks from LUCKY JOHN for angling of predatory fish is designed for sportsmen and "advanced" anglers. And there is nothing surprising about it – LUCKY JOHN hooks are made only in Japan, in the best specialized factories of the country. In their production, only the highest-quality materials and modern technologies are used. All these factors serve as a guarantee of the highest consistent quality of the hooks. Special technologies, designing, production and testing of the new series of LUCKY JOHN hooks allowed the manufacturer to satisfy all requirements of professional sportsmen regarding the main part of tackle:

- strict technological quality control on every production stage
- special carbon-alloyed steel
- modern heat treatment technologies
- high strength
- finest sharpening of hook point
- durable anti-corrosive coating

LUCKY JOHN LEADERS

LEADER SSW AFW

SSW AFW leaders – light steel fibres twisted in a 7x7 braided leader. This makes them especially soft and reduces deformation during the fishing. The leaders are equipped with high quality swivels (for connecting to the main fishing line) and swivels with snaps (for attaching the bait). Having two swivels significantly reduces the twisting of the fishing line.

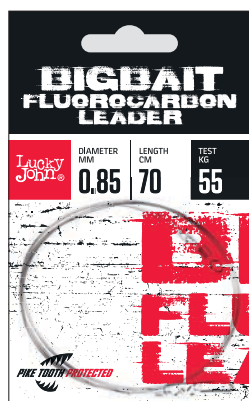

- alloy steel
- deformation resistant
- high strength
- corrosion-proof

BRAIDED FISHING LINE FEEDER CONCEPT POWERSINK DARK BROWN

Braided fishing line made of high quality 4 strand PE fibre, specially designed for feeder fishing. Sinking braided line with dense round cross-section and low stretch. Slippery line allows to reach maximum casting distances and accuracy.

- Sinking
- High strength
- Increased durability
- High sensitivity
- Maximum casting distance
- All-season usage
- Dark brown color

STRENGTH TABLE

Diameter (mm)	0,113	0,131	0,153	0,172

FEEDER CONCEPT LINE DISTANCE X8 BRAID

A modern 8-strand braided fishing line made of PE fibre. The round cross section of the line in combination with a smooth and "slippery" surface provides a long casting distance of the feeder cage. High braid density and increased durability allow the line to be used in all seasons. Supplied in individual package – 150 m length. Excellent combination of price and quality.

- High sensitivity
- Round cross section
- Durable at the knots
- Maximum casting distance
- All-season usage
- Dark green color

COBRA HOOKS

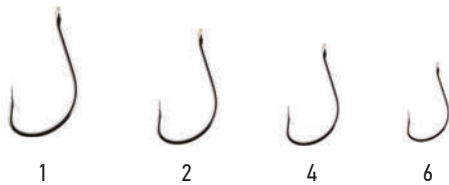

High quality COBRA hooks are manufactured in Korea based on following components:

- high quality carbon alloy steel
- innovative heat treatment technology
- electrochemical hook point sharpening
- laser quality control of sharpening
- corrosion resistant coating

HOOKS COBRA **CC303**

Bait: all kinds
Fish: medium and large

NORFIN®
ULTIMATE PROTECTION

CLOTHING

NORFIN is a brand offering clothing and footwear, giving guarantee of comfort and modern look. Through the years **NORFIN** has accumulated experience, especially in production of clothing for fishing and angling. Our clothing is developed by professionals of clothing manufacturing, but with great involvement and advice from anglers, making sure that

the necessary attention is paid to all essential aspects. **NORFIN** uses the latest materials and designs to make you enjoy your fishing experience without any worries about weather conditions – hot or chilly, rain or sun – **NORFIN** will give you Ultimate Protection!

LAYER SYSTEM

When you are fishing and it is probably the catch of your lifetime, we don't want even the smallest inconvenience to ruin it. That's why we make practical and functional clothing for anglers which will keep you warm in all conditions. Fishing can be a combination of active movement or long and patient waiting, so the clothing must be also universal or suitable for the activity. **NORFIN** clothing can be divided in layers with different functions – all this we call **NORFIN LAYER SYSTEM**.

Each layer of clothing serves its own special purpose.

1. Basic layer – draws moisture away from the body.
2. Warming layer – ensures warmth and insulation without hindering your movements.
3. Additional warming layer – keeps you warm when you don't move.
4. Protective layer – protects you from wind and the effects of weather conditions.

MATERIALS AND TECHNOLOGIES

In comparison to the majority of materials used to manufacture outdoor wear, this modern multiple-layer fabric has improved breathability. Specially designed fibres not only retain body warmth, but also draw moisture to the outside. Your clothing breathes, which makes them extremely comfortable and pleasant to wear. The fabric wicks moisture off the body and prevents sweating, at the same time retaining all thermal insulating qualities of the fabric. The moisture is drawn out through the upper layers of fabric. Extra strong **NORTEX BREATHABLE** material is water-resistant and ensures the long life of the clothing made with it.

HOLLOFIL – High technology insulation with hollow fibers developed by company DuPont.

NORFIN SILENT MATERIAL – Specially designed to disguise your appearance, NORFIN SILENT MATERIAL fabrics are practically noiseless, ensuring great freedom of movement.

CONVERT ROLL – sleeves and lower part of pants can be rolled up and fixed.

UV PROTECTION
Ultraviolet protection indicator.

WINDPROOF – Material with P11 membrane protects you against wind, cold and rain, at the same time letting your body breathe as excess moisture is drawn out through the material.

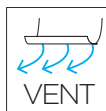

THERMO GUARD – High quality, synthetic insulation made of polyester microfibers, which trap the warm air close to your body, providing you with warmth and doesn't absorb moisture. THERMO GUARD insulation doesn't cause allergic reactions.

COTTON – The main benefits of Cotton are its natural quality and high breathability. Cotton is also highly durable. It absorbs moisture perfectly, which can be very useful for a hot midday when you can refresh yourself by wetting your clothing with fresh water.

NORFIN DRY – The process implies wicking moisture from the body to the surface of the material in hot weather. The moisture quickly evaporates from the surface of material, thus refreshing the body and improving comfort.

NORFIN VENT – Additional ventilation in the underarms and (or) back area.

CONVERT ZIPPER – sleeves and the lower part of pants are attached by a zipper.

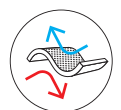

NORFLEECE – material designed to ensure maximal comfort in cold - weather conditions. Its super - lightweight provides excellent mobility, and breathable, high quality insulating fabrics perfectly regulate your core temperature, reducing the possibility of overheating or freezing.

- ▶ Best moisture management
- ▶ Two layer material
- ▶ Comfortable next to skin
- ▶ Dries quickly

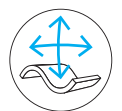

- ▶ High breathability

A man is shown from the chest up, wearing a dark jacket with a white and black pixelated camouflage pattern on the chest and sleeves. He is also wearing a dark cap and yellow-tinted sunglasses. He is holding a black fishing rod with a reel, and his right hand is on the handle. In his left hand, he is holding a small, yellowish-green fish. The background is a bright blue sky with scattered white clouds.

LUCKY JOHN MONOFILAMENT FISHING LINE MICRON

The assortment of next generation fishing line includes minimal diameters; therefore it is well-suited for winter fishing. The line has special protective coating, due to which it has the following properties: it has high strength, does not interact with water –

does not lose its mechanical properties for a long time, retains its parameters in freezing temperatures and is practically invisible to the fish. The line is produced in Japan using raw materials of the highest quality and latest technologies.

- ▶ high strength
- ▶ high durability
- ▶ perfectly calibrated diameters and smooth surface
- ▶ low “memory”
- ▶ high knot strength

ICE SCOOP

ITEM NO.	DESCRIPTION
ZK-400	wooden handle

SAFTY STICKS

Safety sticks are essential fishing equipment. Going out on thin ice without them is very dangerous! Safety sticks are worn around the neck and stay assembled on the angler's chest during fishing. Should the angler fall under the ice he must open the safety sticks and take one in each hand. Then he must thrust the sharp spikes into the ice to get hold of it. Next thrust the spikes into the ice in front of him, he must crawl out onto a firm section of ice.

ITEM NO.	DESCRIPTION
H-10902	with attached cord

BASARA **VIB** S

WOBBLER LUCKY JOHN PRO SERIES BASARA VIB S

These sinking plastic wobblers are effective for fishing large predators, especially pike perch. When pulling, the wobbler vibrates and attracts predators from a large distance. Depending on the fixation place of the fastener the game of the bait will be slightly different. Basara VIB may be used for different fishing techniques and in various waters. The lure has quality Japanese fittings, and it is available in one sizes – 90 mm.

VIB

WOBBLER LUCKY JOHN PRO SERIES VIB

Lucky John VIB – vibrating jigging lure initially profiled for open water fishing but in recent years with great success, has become popular for ice fishing as a lure without acoustic effect. The VIB's balanced weight system is key to its unique vibration, and with a smooth pull the lure begins to vibrate, imitating prey and attracting predators from long distances. Then, with a steady drop, the lure swims and darts like wounded prey triggering crushing strikes.

LUCKY JOHN BALANCED LURE

Balanced lures of LUCKY JOHN Trademark have already won popularity among the best ice lures in many countries across the world. They have shown themselves to the best advantage according to many anglers. Currently the LUCKY JOHN balanced lures resemble natural prey items – the fry so much that bite is virtually guaranteed at any time, irrespective of activity of fish. An ideal game of the lure, imitating an escaping fry, allows not only luring a predator immediately under the hole, but also attracting it from a longer distance. Besides, the excellent balancing of the lure allows harvesting a maximum large water area under the hole. Several models, rich variety of colours and sizes allow matching necessary lure in order to catch more fish and to enjoy fishing as much as possible! LUCKY JOHN balanced lures model CLASSIC and FIN are equipped with strong and sharp KAMASAN hooks.

Additional designations in marking

Particularly strong fastening of PC tails that come in two colours

KAMASAN strong and sharp Japanese hooks

All lures are individually packed, irrespective of the size, they come completed with a treble hook with a coloured drop.

BALANCED LURE **LUCKY JOHN BALTIC**

The Lucky John Baltic is a compact, weighted jigging minnow designed to fish at depths, with or without current. Available in 40 mm, 50 mm and 60 mm sizes, these three models weigh 10 grams, 22 grams, and 46 grams respectively; the smaller size Baltic has been a go to perch bait for anglers worldwide, with the larger models being a particular favored lure for deep water walleyes.

The Baltic is available in clear or red options for the rear tail stabilizer, and are also available in attention grabbing holographic patterns that stand out in deep or stained water. The fierce "samurai" detailed finish is augmented by Japanese Kamasan hooks front and back, along with a sticky sharp beaded VMC hook on the bottom.

BALANCED LURES **LUCKY JOHN NORDIC**

NORDIC is heavy, compact, ideally Balanced lure, specially designed for the deep-water lakes and rivers with a fairly strong currents. The lure is available in three sizes – 40, 50, 60 mm and accordingly – 12, 21 and 36 g weight. Classic form of the lure looks like a small fish and therefore attracts the attention of a predator.

BALANCED LURES **LUCKY JOHN CLASSIC**

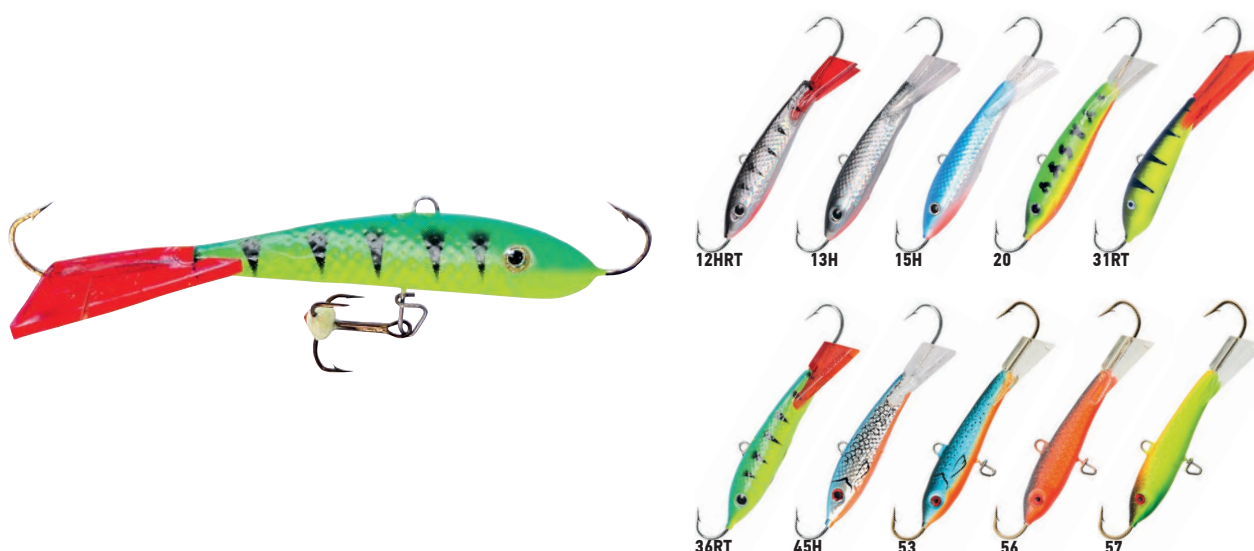

The most popular among anglers model. A hard tail of the lure makes the lure a wider and quicker play. During stirring of the predators you can achieve the best results thanks to these lures. Please note, there are two colours of the tail available in assortment – red and transparent. All lures are individually packed, irrespective of the size, they come completed with a treble hook with a coloured drop.

BALANCED LURES **LUCKY JOHN FIN**

The FIN balanced lures have a flatter body in section than the CLASSIC model. Therefore the "Fins" harvest a larger underwater area. The FIN lures come in three sizes, out of which you can easily pick up a necessary size for fishing a perch, a pike or a pike-perch, as well for different levels of luminosity under water. All lures are individually packed and come completed with treble hook and coloured drops.

WINTER SOFT LURES LUCKY JOHN**ARTIFICIAL BLOODWORM LUCKY JOHN
EXTRA BLOOD WORM PACKAGE**

Artificial bloodworm Lucky John Extra Blood Worm with its bright colour, long-lasting scent and flavour attracts the fish no worse than the real one. During winter, while passing from one ice-hole to another, the artificial bloodworm not only will not freeze (as would real bloodworm), but also will wag its tail just as lively even after repeatedly being swallowed by a fish.

ITEM NO.	DESCRIPTION	COLOUR (****)	Q-TY IN A PACK (PCS.)
140201-001	Artificial bloodworm	red	200
140201-002	Artificial bloodworm XL	red	160

**ARTIFICIAL MAGGOT LUCKY JOHN MAGGOT
PACKAGE**

Artificial maggot Lucky John Maggot – excellent flavour and scent close to real. It has a number of advantages in comparison to the real maggot: it surpasses the real maggot in attractiveness, does not freeze at low temperatures, holds on a hook for a much longer time, does not pupate, has unlimited shelf life and is always at hand while fishing.

Thermo +

- ▶ retains warmth of the body
- ▶ protects against wind and cold
- ▶ «breathable» material
- ▶ pleasant to the touch

TEFLON – is the material covered with layer of **DUPONT® TEFLON®** to ensure moisture-repellant features.

NEOPRENE – leaf thermal insulation on the basis of light foam rubber. Multiple air bubbles ensure heat retention and provide buoyancy properties of the material.

DOWN – insulation made of natural down having excellent features: light weight and high thermal insulation characteristics, small transportation volume and extended period of use. These features are ensured thanks to its structure: the lightest feathers fill-in the whole volume and is easy to compress.

LEATHER – high quality leather.

IMPLEMENTS

MAGNET – fastening with magnet.

YKK
Little Parts. Big Difference.®

YKK is leader in zipper production, offering no-compromise quality. **YKK** zippers, which are made in Japan, can be found from the earth's oceans and into space, every environment known to man.

TECHNICAL TERMS

TEMPERATURE – the minimum recommended threshold for use.

WATERPROOF – index number describing the waterproof feature of the material.

BREATHABLE – Measured in g / m² for 24 hours.

PURPOSE

FISHING – clothing designed for fishermen.

HUNTING – clothing designed for hunters.

SNOWMOBILE – clothing suitable for use on snowmobile.

FLOATING – buoyant suits, which help you to stay on the water and increase the safety. As insulation material is used buoyancy porous layer that provides buoyancy feature.

MATERIALS AND TECHNOLOGIES OF NORFIN

TECHNOLOGIES

DUALTHERMAL SYSTEM – insulation technology system that efficiently combines natural down and synthetic fiber. Balanced proportion of natural down and synthetics allows to reach heat-insulation and «breathing» features that can't be obtained using weather down or synthetics. Structurally the insulation consists of two layers: the inner layer – HOLLOFILL and the outer layer – down and feather.

- Doesn't pill – maintains the form during extended period of use
- Retains high heat-insulation features during extended period of use
- High «breathing» capacity
- Improved resistance to outer negative factors including high humidity.

MATERIALS

NORFIN SILENT MATERIAL – Specially designed to disguise your appearance, **NORFIN SILENT MATERIAL** fabrics are practically noiseless, ensuring great freedom of movement.

HEAT SYSTEM

Norfin Heat System is next step in comfort in extremely cold weather. System is powered by 2.1 amp or higher output Power-bank and is heating most exposed places on body – back and legs. Controlled with one-touch LED waterproof smart temperature controller with 3 heat settings.

It is safe low voltage system which can withstand moisture and even washing.

SETTING	LED COLOR	APPROX. TEMPERATURE °C	AVERAGE DURATION WITH 5 AH POWER-BANK
Low	Blue	38	6,5 h
Medium	White	45	4 h
High	Red	55	2 h

How it works:

1. Press and hold button for 2 sec. until the red color turns on (high temperature)
2. Click to switch to medium temperature – white color
3. Click to switch to low temperature – blue color
4. Change temperature setting by each click in cycle.
5. Press and hold for 2 sec. to turn off.

NORTEX BREATHABLE – is a technologically highly developed multi-layer material ensuring great breathability at the same time being completely wind and waterproof, protecting you from bad weather. **NOR-TEX BREATHABLE** perfectly holds the insulation, warm air and retains the warmth of the body. Because of the breathability of the material, clothing made of **NOR-TEX BREATHABLE** is pleasant and comfortable. When moving actively the excess moisture and sweat are discharged to the external layers of the fabric while the body warmth is retained due to its thermal insulation features.

HOLLOFIL – high technology insulation with hollow fibers developed by company DuPont, using the fiber with 4 hollow holes that allows the material to retain warmth without extra weight. This material regains its features after compression, it is compact and soft. Easy to wash and antiallergenic.

THINSULATE – synthetic insulation manufactured by the company with the same name. The insulation consists of micro fibers able to hold more air in smaller volume, therefore it has better warmth retaining capacity. The insulation is air-proof and doesn't absorb moisture. It retains its features after washing and dry-cleaning.

WINDPROOF – «breathing» material with **PU** membrane, protects from wind, cold weather and moisture.

THERMO GUARD – modern high technology synthetic insulation on the base of polyester micro fibers. It holds the air thanks to its porous structure thus ensuring warmth retaining, antiallergenic and doesn't absorb moisture.

WINTER SUIT NORFIN EXTREME 5

Functional 3 in 1 winter suit made of high quality, breathable and waterproof material NORTEX BREATHABLE, features a removable inner jacket and will keep you warm and comfortable at temperature as low as -45°C. NORFIN III LAYER SYSTEM

When you are fishing and it is probably the catch of your lifetime, we don't want even the smallest inconvenience to ruin it. That's why we make practical and functional clothing for anglers which will keep you warm in all conditions. Fishing can be a combination of active movement or long and patient waiting, so the clothing must be also universal or suitable for the activity. NORFIN clothing can be divided in layers with different functions – all this we call NORFIN LAYER SYSTEM.

<div data-bbox="183 495 204 595" data-label="Image"></div> BASE LAYER <ul style="list-style-type: none"> • Transfers moisture from the body • Ensures breathability • Maintains core temperature 	<div data-bbox="571 495 624 595" data-label="Image"></div> INSULATION LAYER <ul style="list-style-type: none"> • Ensures warmth and insulation • Transfers moisture to outside • Maintains core temperature 	<div data-bbox="997 495 1078 595" data-label="Image"></div> PROTECTIVE LAYER <ul style="list-style-type: none"> • Protects from weather, rain and wind • Keeps warmth to the body • Transfers moisture to outside
--	---	---

NORFIN LAYER SYSTEM

- 1 Base layer – transfers moisture from the body
- 2 Insulation layer – ensures warmth and insulation and at the same time doesn't restrict your movement
- 3 Protective layer – protects from weather, rain and wind

NEW

WINTER BOOTS NORFIN KLONDAIK 2

Winter boots made of EVA material with removable insole. Thanks to the thick and warm insole and EVA (foam rubber) material, boots can be comfortably used at temperatures as low as -40°C.

ANTI-SLIP DUO system – two retractable ice cleats for added safety and protection. Cleats are made of durable stainless steel which prolongs their use in various weather conditions.

Triple 10 mm thick insole provides thermal insulation:

- Inner Thinsulate™ layer provides thermal insulation and absorbs and wicks away moisture.
- Heat reflecting aluminum foil keeps cold away and keeps body heat to the foot
- External layer of polyester provides required insulation and wicks moisture from the insole.

Material: EVA, Rubber
Insulation: THINSULATE

WINTER BOOTS NORFIN AVALANCHE

Warm and comfortable, lightweight winter boots made of EVA material with rubber sole, feature a high quality synthetic material insulation. You can use these functional boots in temperatures up to -40°C . Three layer, 10mm thick liner ensures reliable thermal insulation:

- ▶ 200g Synthetic felt layer ensures thermal insulation and absorbs moisture
- ▶ Foil reflects cold air and keeps the warm air inside
- ▶ Fleece holds the warm air and ensures thermal insulation
- ▶ Abrasion resistant nylon upper
- ▶ Adjustable snow collar

Materials:
Outsole: **EVA, Rubber,**
Upper: **1200 D Nylon**
Insulation: **Polyester, foil**
