MOMOI FISHING PRODUCT CATALOG

MX8 PRO BRAID

MULTICOLOR: 300M

JigLine MX8 Pro has been released with a professional specification that improves JigLine MX8's famous toughness. It fulfills the suitable tension and high operability at the same time with MX8 braiding technology which evolves the maximum potential of ultra-strong PE fiber. Also JigLine MX8 Pro has high durability which can resist the long-time jerking guide abrasion by Momoi's new triple silicon coating technology. JigLine MX8 Pro is a completely new PE line specialized for jigging and gains the satisfaction and trust of all anglers.

Features

- Ultra Strong 8 braided HPPE
- Evolved "MX8" Braiding Technology
- Triple Silicon Coating
- High Tractability
- Amazing Flexibility & Toughness
- 10mtr x 5 colors

Genre

- · Jigging · Boat Fishing

RYUGIN BRAID

LIME GREEN: 150M, 200M, 300M

ORANGE: 150M, 200M, 300M

An extra-strong and extra-soft PE line that pursues the desire to “cast further” and “have more flexibility.” By having an exquisite balance in the braiding, this extra-flexible line caters to a variety of the anglers’ needs. Adopting “extra silent mode” that minimizes noise with the guide, it is a PE line for versatile use such as surfcasting, wharf fishing, lure fishing, and light jigging.

Features

- 8 Braids
- Special Soft Processing (MJS Processing)
- Ultra Flexibility
- Ultra Strength
- No Elongation
- Extra Silent Mode

Genre

- Lure Fishing · Boat Fishing · Jigging · Inshore Fishing · Casting · Eging · Ajing

SOFLEX FC

Fluorocarbon: 50M

This product covers the disadvantage of the standard fluorocarbon such as strains and hard memory due to low stretch and high sensitivity, and realizes high handleability. With its special soft processing, it maintains the natural advantages of the fluorocarbon such as high sensitivity and strength, and at the same time adds high-level softness and flexibility. It is not subject to peculiar winding and has distinguished conformity to the spool. The casting ability has also improved dramatically thanks to the consideration to guide friction upon casting. Also focusing on the abrasion resistance, it excels its power even at complex places.

Features

- Ultra Strong MIJ Fluorocarbon
- High Flexibility & Softness
- High Sensitivity
- MJS Processing
- Non Pressure Spooling
- UV Block

Genre

Main Line: Bass Fishing, Sea Bass Fishing, Salt Water Light Game

Leader Line: Boat Fishing, Rock Fishing, Casting, Sea Bass Fishing, Trout Fishing
